SECTION A - A
TEMPORARY REINSTATEMENT

SCALE 1:25

SECTION B - B
TEMPORARY REINSTATEMENT

SCALE 1:25

215mm Reinforced Grade C35 Concrete Slab

75mm Thick Blinding

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610

215mm Thick 40N/mm² R.C Wall

Top of Wall to FRL

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610

215mm Thick 40N/mm² R.C Wall

Top of Wall to FRL

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610

215mm Thick 40N/mm² R.C Wall

Top of Wall to FRL

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610

215mm Thick 40N/mm² R.C Wall

Top of Wall to FRL

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610

215mm Thick 40N/mm² R.C Wall

Top of Wall to FRL

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610

215mm Thick 40N/mm² R.C Wall

Top of Wall to FRL

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610

215mm Thick 40N/mm² R.C Wall

Top of Wall to FRL

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610

215mm Thick 40N/mm² R.C Wall

Top of Wall to FRL

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610

215mm Thick 40N/mm² R.C Wall

Top of Wall to FRL

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610

215mm Thick 40N/mm² R.C Wall

Top of Wall to FRL

300 x 300mm Galvanized Steel Sump Grating

Concrete Grade C35/N20 with a minimum cement content of 325kg/m²

Concrete Cover to Reinforcement to be 40mm

C804 Material compacted in layers in accordance with CL802.

Granular Backfill to Clause 610
